Delivered to: Church School

Gentlemen:-

Our Recharge Service Records show that at this time last year we furnished you with the following fire extinguisher recharges:

QUANTITY	SIZE	TYPE
24	2½ Gal.	Soda & Acid

As this type of fire extinguisher should be discharged, inspected and recharged annually, in order to comply with Fire Department and Insurance regulations that they be kept in operative condition, we are taking the liberty of calling the matter to your attention.

We will be glad to furnish the necessary charges again this year upon receipt of your order or the enclosed postal.

Very truly yours,

THE WM. H. WHITING CO.
M. O. GRAHAM

P. S. Pyrene Vaporizing Type of fire extinguisher need not be recharged annually, but should be inspected periodically and kept filled. Carbon-dioxide extinguishers should be weighed at least once annually. If an extinguisher shows a loss of 10% or more of the rated capacity stamped on it, it should be sent in to us for recharging.

June 11, 1953

Mr. M. O. Graham
The Wm. H. Whiting Co.
Pratt and Gay Streets.
Baltimore 2, Maryland

Dear Mr. Graham:-

In regards to your letter dated May 23, 1953 reminding us to have our extinguishers recharged.

We wish to thank you for this service. When we purchased our last recharges from you, we bought a two year supply. We will keep you in mind when ordering again.

Thanking you again for this service.

Very truly yours,
The Church Council
United Evangelical Church

J. Albert Pader SR.
Secretary.
